Training And Certification

Enigma Camp Fullstack Software Engineer Training

Nov. 2020 - Feb. 2021

React.js · Java Springboot · Kotlin

Develop an application using Java Spring Boot that accesses a database server, test data and performs unit testing (JUnit & Mockito), transforming UI design into JavaScript-based web using React.js, deploy an application in Docker with Docker Containers and developing Android applications using Kotlin from scratch

SanberCode Online Course

- Using Figma applications, demonstrate all stages of UI/UX development, starting with user research and determining project scope, then creating wireframes, mockups, and other design deliverables.
- Utilize the NextJS framework to build web-based applications, integrate APIs, manage states, verify authentication, deploy, and build. A full stack application will be built from scratch using RestAPI and Hooks using React Server Components.

BuildWithAngga Online Course

Utilizing the MERN (MongoDB, Express.js, React, Node.js) stack to develop end-to-end web applications. Implementing Atomic Design principles for optimal component organization and Node.js framework for routing, middleware, and database integration, ensuring seamless communication between client and server.
